HP TRIM Check-Up Package

Intact Technology is offering its HP TRIM Check-Up package to ensure your current HP TRIM configuration is producing at its best. This solution package is aimed at helping you maximize the operational effectiveness of your HP TRIM implementation.

Through a comprehensive review of your current configuration, one of our Information Management consultants will check the health of the configuration and assess the technical environment. Recommendations for optimizing the configuration are then provided in a Check-Up Report, including;

- Ways to fine tune the current configuration
- Ways to improve reliability, efficiency and usability
- Ways to further expanded the use of HP TRIM within the organization

Maximize your HP TRIM investment

- Improve efficiency
- Improve ease of use
- Increase staff knowledge

Check-Up Package	Check-Up Package and Upgrade
