

# Intact Cloud

## Redefining and Revolutionizing Business Technology and Information Optimization Software Solutions

### Intact Cloud Overview

A cloud-computing environment that leverages HP software to illustrate the power of HP BTO and BIO solutions. It is the only fully configurable environment with all HP Software integrated using an ITIL based CMS strategy utilizing multiple CMDBs at the core. The cloud is designed to be quickly reconfigurable to illustrate business cases for product combinations and integrations

### Intact's Lab

Intact has worked tirelessly with HP to develop and test a solution for integrating HP with third party CMDBs including competitors products. Our goal is to provide a seamless integration allowing for the IT organization to see the immediate value. Intact's overall lab vision, gives insight into how we integrate the following products:

- UCMDB 8
- DDM (AE & I)
- Release Control 4.10
- Service Manager 7.10
- Connect-IT
- Decision Center
- Operations Orchestration 7.1
- Business Service Management (formally Business Availability Management) 8
- Business Service Automation
- Operation Manager 8.1
- SiteScope 10
- NNMI 8.10
- OMDMA
- OMI
- Asset Manager 5.10
- SOA Center
- BMC Remedy
  - o ITSM 7.X
  - o Atrium CMDB 2.X
- Microsoft
  - o SCOM
  - o SCCM

### Benefits

- Demonstrate real life scenarios with customized datasets, integration and workflows
- Customizable for the clients
- Respond quickly and efficiently to customers demo request
- Virtualizes Demos and POC
- We can demonstrate the power of the integrated HP suite with competitors products

### Next Generation

Intact Technology; strengthening the connection between business operations and IT. Intact specializes in helping customers design, implement, operate, and automate their IT service management, configuration management, and business service management. Intact uses deep expertise and practical experience to stabilize and optimize IT organizations. Customers realize increased efficiency, reduced risk, and measurable business results. An HP Platinum Software Partner and a HP Universal CMDB partner, Intact applies intellectual property to create deployment accelerators that distinguishes the company to clients and partners.

Intact has the most comprehensive integrated lab environment of HP Software and BMC. Our environments can be tailored to specific business cases to cater to the customers needs. Intact is the only company with the full and complete integration of HP and BMC for change. Intact has strategically partnered with Hewlett Packard to help develop a next generation out of the box solution now. This strategic partnership has allowed for development of newer versions of the integration and currently in development of the integration/federation of data from Atrium to UCMDB and other BMC integrations.

### Why Intact

- Unique discovery pattern framework -Reduces creation of new discovery patterns by 50%
- One of the few HP Elite Universal CMDB Implementation Partners
- Unique and tested source discovery and mapping Package
- Proven process- our rapid application mapping can map over hundred applications quickly.
- The leader- In integration solutions around creating CMSs including the BMC Atrium and HP UCMDB integration

- We Have Experience Meeting Aggressive Timelines: Intact has a proven reputation of success in meeting aggressive deadlines within the public and private sector that will ensure the most efficient implementation
- Intact Meets All Your Needs: We provide full-scale systems integration, which allows us to go well beyond what a single vendor can accomplish. Intact has the ability to integrate and customize a variety of products and tools within the Infrastructure Management (IM) industry.
- The Intact Team – Largest team of Sr. UCMDB, DDM and Release Control delivery Professional Services Consultants. Our Key Personnel are the best and brightest HP software consultants in the world
- Intact Helps Obtain Faster Time-to-Value: Intact will deliver faster time to ITIL best practice process implementation while also reducing system design timelines.
- Experience- We provide in delivering successful end to end BTO solutions
- Proven integrations- Integrated demo labs with integrations between HP BTO products
