

## Is Your FDCC Data Valid? Make sure now!

Intact DCi™ (Data Center Inventory) accelerates agentless inventory capture as a fixed-price, outcome-based service.

### The Challenge:

Collecting all required data on deadline; making sure it's complete and accurate.

The Federal Data Center Consolidation (FDCC) initiative requires agencies to inventory all the assets in all their facilities. How can agencies ensure compliance with inventory data that's trustworthy as the basis for their FDCC plans?

### The Solution:

Intact captures and delivers data center inventory data in OMB-ready reports.

Intact's DCi (Data Center Inventory) service gives your agency a fast, contained, and cost-effective way to validate the data you have or capture new inventories.

Our agentless discovery process is far more accurate than manual counts. It tracks down every asset in your facilities, including:

- Systems, networks, hosts, network devices, and other resources
- Applications running on devices
- System dependencies
- Device and application configurations

Once this inventory is complete, we correlate it with utilization data and map it back to major systems.

Our final product is your deliverable: OMB-ready data that's formatted to the requirements of the FDCC template. It's all ready to turn in so you're finished with Phases 1-2. Let us know how we can help you in phases 3-6 with analysis, planning, and execution.

Get a Data Center Inventory capture quote within 24 hours.

Department Name		Example				
Agency Name		Example				
IT Software						
IT Hardware						
Department Name		Example				
Agency Name		Example				
Data Center Name	Server Types	Physical Servers			Virtualization	
		Total Physical Server Count (#)	Max Server Utilization (%)	Average Server Utilization (%)	Total Virtual Host Count (#)	Total Virtual Count (#)
Martinsburg, WV	Mainframes (IBM or Compatible)	2	92.000%	84.000%	42 LPARS	N/A
Martinsburg, WV	Mainframes (other)	2	78.000%	65.000%	35 LPARS	N/A
Martinsburg, WV	Windows Servers	1187	34.000%	7.000%	74	210
Martinsburg, WV	Unix Servers	391	44.000%	19.000%	0	0

## Intact also assists you with FDCC phases 3-6:

Phase  
**3**

**Requirement:**  
Analysis and Strategic Decisions

**Intact provides:**

- Data analysis
- Recommendations for consolidation targets
- Consolidation strategy and roadmap
- Risk and value assessments

Phase  
**4**

**Requirement:**  
Design and Transition Planning

**Intact provides:**

- Cloud, virtualization, and data center consolidation solution development
- Scoping and planning of transitions and projects
- IT operational process improvement

Phase  
**5**

**Requirement:**  
Consolidation and Optimization Execution

**Intact provides:**

- Execution and deployment of virtualization, cloud, or data center consolidation plans
- Project benefit validation and due diligence
- Data Center and Business Center Automation
- Metrics collection and reporting

Phase  
**6**

**Requirement:**  
On-Going Optimization Support

**Intact provides:**

- Infrastructure management planning
- Ongoing maintenance and consolidation management support
- Project benefit analysis and validation
